

## **Maintenance Crew Field Leader**

Hourly Wage \$50.17 This is a Union position.

The Maintenance Crew Field Leader is a critical member of a team that provides construction and maintenance functions to District water assets, customer service support and water quality services for Water District # 49 in Burien, Washington.

This position's primary duty will be to plan, schedule and oversee the physical repair and replacement of water appurtenances, such as water main and hydrants. In addition, this position will oversee operations of the District's facilities, which include a couple of booster stations and reservoirs. This position will work closely with the General Manager on all compliance water quality action items and any other projects as assigned.

Candidates need to have knowledge of a Group A public water system and the requirements of Chapter 246-290 and 246-294. This is a highly technical position that will need critical thinking and sound accurate decision-making. Must be able to read, write and communicate clearly in English and have basic math skill. In addition, multi-tasking and prioritizing critical tasks in needed.

### **EDUCATION AND EXPERIENCE**

- Requires high school graduation, 5 years of experience in water construction, operations or water quality tasks OR, any equivalent combination of education and/or experience
- Washington State Department of Health Water Distribution Manager 3
